JOSEPHAT ONTUGA

Software Developer | Python · Java · JavaScript/Node.js · Full-Stack
Nairobi, Kenya (Remote) | ceetech8090@gmail.com | +254 798109284
https://www.linkedin.com/in/josephat-ontuga-984b14411/ https://github.com/Josephat22

PROFESSIONAL SUMMARY

Software developer with a Master's degree from the University of Nairobi (2023) and 5+ years of experience designing, building and reviewing scalable software in Python, Java and JavaScript/Node.js. Strong in full-stack development, software architecture, code review and technical documentation. Experienced in distributed remote teams and skilled at explaining complex technical concepts clearly in writing and conversation. Interested in applying domain expertise to AI training and evaluation work.

CORE SKILLS

Hardware & Peripherals: Computer hardware installation, maintenance and troubleshooting; printers, scanners, CCTV systems, biometric devices and other ICT peripherals

Operating Systems & Software: Windows and Linux administration; software installation, updates and upgrades; Microsoft Office Suite

Networking: LAN, WAN, TCP/IP, Wi-Fi, routers and switches; connectivity troubleshooting; user account management

IT Support & Helpdesk: First-level technical support, helpdesk and ticketing processes, IT inventory and asset register management

Cyber Security & Data: Cyber security best practices, data backup and recovery, database and data management, adherence to IT policies and information security requirements

Cloud & Collaboration: Cloud technologies and collaboration tools (e.g., Microsoft 365, Google Workspace, Teams/Zoom)

Programming & Documentation: Python, Java, JavaScript/Node.js, SQL; software testing support; technical documentation, user guides and ICT procedure write-ups

PROFESSIONAL EXPERIENCE

Software Developer / Full-Stack Engineer 2025
Telus— Remote

- Designed and delivered scalable web applications and REST APIs using Node.js, Python and Java, supporting [X]+ users.
- Led code reviews for a team of [X] developers, giving actionable feedback on correctness, performance, security and maintainability.
- Contributed to system architecture decisions (service boundaries, data modelling, caching), improving response times by [X]%.
- Wrote and maintained technical documentation, including design docs, API references and runbooks, reducing onboarding time for new engineers.
- Automated build, test and deployment pipelines with Docker and CI/CD, cutting release time by [X]%.

Software Developer 2026
Afterquery

- Built and maintained full-stack features with React front ends and Node.js/Java back ends.
- Refactored legacy modules to improve readability, test coverage (to [X]%) and long-term maintainability.
- Collaborated with product owners and distributed teammates to analyse requirements and deliver on schedule.

Freelance
Remote
- Delivered custom software solutions for online clients in Python and JavaScript, from requirements through deployment and documentation.

SELECTED PROJECTS

SokaPulse — Live Football Android Application | 2026

Tech Stack: Kotlin, Jetpack Compose, Material 3, Navigation Compose, ViewModel, StateFlow, Coroutines, OkHttp, Cloudflare Workers.

Designed and developed a modern Android football application featuring live scores, fixtures, league standings, match statistics, lineups, and football news. Implemented a responsive UI using Jetpack Compose and integrated football data through a Cloudflare Workers API proxy to improve API security and data handling.

Source: "GitHub — SokaPulse" (https://github.com/Josephat22/SokaPulse) (Private Repository)

SmartLearn Academy — Android Learning Application | 2026

Tech Stack: Kotlin, Jetpack Compose, Android SDK, Gradle.

Developed an Android learning application focused on delivering an interactive learning experience. Applied modern Android development practices, reusable UI components, and structured application architecture to support maintainability and future feature expansion.

EDUCATION

Master of Science in [Computer Science 2023
University of Nairobi, Nairobi, Kenya
- Thesis/Research: machine learning, software quality

Bachelor of Science in [Computer Science 2020
University of Nairobi, Nairobi, Kenya

CODE REVIEW, DOCUMENTATION & AI TRAINING STRENGTHS

Technical Skills & Professional Experience

- Code Review & Quality Assurance: Review complex codebases for correctness, security vulnerabilities, performance, and adherence to coding standards. Provide clear, actionable, and constructive feedback.
- Technical Documentation: Develop user-friendly documentation and explanations that simplify complex software concepts for diverse audiences.
- AI Training & Programming Content: Create high-quality, realistic programming examples, coding challenges, and step-by-step problem-solving walkthroughs for AI training and evaluation datasets.
- Remote Collaboration: Collaborate effectively in remote, asynchronous environments across time zones using Git, Slack, Jira, and video conferencing tools.
- Software Development: Apply Java, Kotlin, Python, and modern software engineering practices to develop, debug, test, and maintain applications.

CERTIFICATIONS

AWS Certified Developer – Associate
Oracle Certified Professional, Java SE
